

For the erection with supervisor we send you one or more assemblers (see quotation) which help you with the erection of the GLS tank(s). Our assembly staff teaches your assemblers the correct erection on site and also helps with the erection.

The quantity of assemblers provided by client as well as the duration of erection can be found in our quotation. If the helpers are not well qualified this has a direct influence on the erection time.

The assemblers provided by the client have to provide following skills to erect the tank correctly with the help of our supervisor(s):

- Speaking German or English
- No fear of heights (free from giddiness)
- Healthy and strong enough to work
- Willing to work and team-minded
- Readiness of mind and willingness to work independent

The GLS Tanks International GmbH reserves the right to request suitable replacement for not suitable assemblers within 24 hours.

GLS Tanks International is only liable for damage caused by our assembly staff. Excluded from liability are any damages on persons and goods as well as secondary damage. The GLS Tanks International GmbH is to exempt from third party damage claims.

Lodging

The client has to arrange the stay of our assembly staff (incl. breakfast) in a 3 star hotel, according European standards. In case this is not possible this has to be clarified with the GLS Tanks International GmbH before signing the contract.

Board

According to the quotation

TRANSFER

The client has to arrange the safe transport for our assemblers between airport, hotel and site if the arrival is not done with our assembly car. (without costs for GLS)

Erection time / invoicing

The erection time mentioned in the quotation is according to estimated values incl. onetime arrival and departure, with professional tools, capable helpers provided by client, no delays caused by weather or environment and that the services provided by the client are fulfilled correctly. The estimated days for erection (incl. onetime arrival and departure) are calculated in the total sum. Differences will be credited or invoiced. Maximum after two months the assemblers have the right of an erection break (=travelling home to Heidenreichstein and 4 days off). The costs for the trip home and the therefore necessary journey back to site are not calculated in our quotation and will be invoice together with the erection bill after finishing erection according to the erection rates mentioned in our quotation. We will send you replacement assemblers if available. Sundays and Austrian holydays are generally free of work. If it is desired to work on these days a surcharge of 100% on the standard rate will be charged. It must be guaranteed to work 6 days a week consistently up to 10 hours a day.

Travel warning:

Here you will find a list of countries for which a (partial) travel warning is issued:

<http://www.bmeia.gv.at/aussenministerium/buergerservice/reisewarnungen.html>

We do not travel to countries for which a (partial) travel warning is issued. If the management of GLS tanks International GmbH decides in exceptional cases to provide a supervision erection in one of these countries our client has to guarantee for the security of our assembly staff. Risk, danger and damage from omission of this duty are at the expense of the customer. A list of security measures has to be submitted to the GLS Tanks International GmbH to make a decision. Danger, risk and damages will nevertheless be at the expense of the customer.
